Aesthetic Technology and Equipment

PCL Technology (Power Cell Lift) - A non-invasive face lifting technique, which injects multiple threads for strong lifting effect and for enhancing cell engraftment.

Lipocryo Technology - The ultimate fat removal technology that freezes fat cells and progressively eliminates them.

PRP (Platelet Rich Plasma) - Is an autologous product that concentrates a high number of platelets in small volume of plasma that works at a cellular level, stimulating the human body's own healing processes.

Colonic Hydrotherapy - A health practice that gradually and gently cleanses the colon by flushing the large intestines with warm, filtered water, without the use of any chemicals or drugs.

Interior Design

Indonesian Contemporary with a touch of French flair
